

Materiality Assessment Worksheet

Sort your company's impacts and risks into GRI-material, IFRS-material, or both

How to use this: List every impact, risk, or issue your company can identify — across operations and the value chain. For each one, ask two separate questions. **GRI test:** is this a significant impact on people, the environment, or the economy? **IFRS S1/S2 test:** could this reasonably affect cash flow, financing, or the company's prospects? An issue can be material under one lens, both, or neither — mark each column honestly rather than assuming the same answer applies to both.

Company / Business Unit

Prepared By

Date

ISSUE / IMPACT IDENTIFIED	WHERE IN THE VALUE CHAIN	GRI MATERIAL?	WHY (IMPACT ON PEOPLE / PLANET)	IFRS MATERIAL?	WHY (EFFECT ON CASH FLOW / FINANCING)	NOTES / NEXT STEP
Example: Wastewater discharge	Own operations	☒ Y ☐ N	Affects river ecosystem and nearby farmers' water access	☐ Y ☒ N	No fines or regulatory pressure at present	GRI-only for now — monitor for regulatory change
		☐ Y ☐ N		☐ Y ☐ N		
		☐ Y ☐ N		☐ Y ☐ N		
		☐ Y ☐ N		☐ Y ☐ N		
		☐ Y ☐ N		☐ Y ☐ N		
		☐ Y ☐ N		☐ Y ☐ N		
		☐ Y ☐ N		☐ Y ☐ N		
		☐ Y ☐ N		☐ Y ☐ N		
		☐ Y ☐ N		☐ Y ☐ N		

Reading Your Results

Y / Y — Material Under Both

Your strongest disclosure candidates. These issues carry real-world impact and could plausibly move cash flow, financing, or valuation. Prioritize these first in both your GRI and IFRS S1/S2 reporting.

Y / N — GRI-Only

A genuine impact on people, environment, or economy, but no clear financial link today. Still worth disclosing under GRI, and worth re-checking under IFRS as regulation or stakeholder pressure evolves.

N / Y — IFRS-Only

Financially relevant but not a standout impact issue on its own. These are easy to miss when a company starts from a purely impact-driven mindset — review this column carefully.

N / N — Likely Not Material

Neither test is triggered. Keep a short note of why it was screened out, in case circumstances change in a future reporting period.

Value Chain Reference

Use these stages as prompts when filling the "Where in the Value Chain" column: **raw materials & suppliers → own operations** (factories, offices) → **distribution & logistics → customers & product use → end of product life**. Impacts and risks can originate at any stage, not only inside your own operations.
